Digital and Data Literacy

Duration	Fee	Category
1 Week	**from £3,100**	**Business Intelligence & Data**
Ref	**Language**	**Certificate**
BI411	**English**	**Certificate of attendance**

Introduction

This comprehensive 5-day training course is designed to equip participants with the essential digital and data literacy skills required in today's technology-driven business environment. The course focuses on understanding digital technologies, managing and interpreting data, improving digital communication and collaboration, and developing data-driven decision-making capabilities.

Participants will gain practical knowledge of digital tools, data analysis concepts, cybersecurity awareness, data visualisation, and digital transformation trends that are increasingly shaping modern organisations.

Course Objectives

By the end of this course, participants will be able to:

- Understand the fundamentals of digital literacy and digital transformation.
- Develop practical skills in handling, managing, and analysing data.
- Interpret data effectively for business decision-making.
- Use digital tools for communication, collaboration, and productivity.
- Understand data privacy, cybersecurity, and ethical data usage.
- Create basic data visualisations and reports.
- Improve critical thinking and problem-solving using data insights.
- Recognise emerging digital technologies and their impact on organisations.

Target Audience

This course is suitable for:

- Administrative Professionals
- Business Professionals
- Government Employees
- Finance & Accounting Personnel
- HR & Operations Staff
- Project Coordinators
- Team Leaders & Supervisors

- Entry-Level Data Users
- Professionals involved in digital transformation initiatives
- Anyone seeking to improve digital and data literacy skills
