Maritime Safety Management & Emergency Response

Duration	Category	Ref
1 Week	**Contracting & Legal**	**CL458**
Language	Certificate	
English	**Certificate of attendance**	

Introduction

This 5-day course provides participants with practical knowledge of maritime safety management, emergency preparedness, risk control, and effective response to incidents at sea and within marine operations. It focuses on improving safety awareness, emergency decision-making, and the ability to manage maritime risks.

Course Objectives

By the end of the course, participants will be able to:

- Understand key principles of maritime safety management.
- Identify and assess hazards in marine operations.
- Develop effective emergency response procedures.
- Improve emergency preparedness and incident coordination.
- Apply risk-control and accident-prevention techniques.
- Understand the importance of safety drills and emergency exercises.
- Respond effectively to common maritime emergencies.

Target Audience

- Marine Safety Officers
- HSE/SHEQ Professionals
- Marine Operations Managers
- Ship and Port Supervisors
- Vessel Masters and Officers
- Emergency Response Personnel
- Marine Engineers and Technical Staff
- Personnel responsible for safety and risk management

Course Outline
