Strategic Security Management

Duration	Category	Ref
1 Week	**Contracting & Legal**	**CL470**
Language	Certificate	
English	**Certificate of attendance**	

Introduction

In today's rapidly evolving business environment, organisations require strategic security management approaches that go beyond day-to-day protection activities. Effective security leadership involves aligning security objectives with organisational priorities, anticipating emerging threats, optimising resources, and ensuring the long-term protection of people, assets, and operations.

The Strategic Security Management course provides participants with an understanding of the principles, tools, and management practices required to develop and implement effective security strategies.

The course explores security leadership, strategic planning, risk-informed decision-making, performance management, resource optimisation, and the integration of security into broader organisational objectives.

Course Objectives

By the end of this course, participants will be able to:

- Understand the principles and importance of strategic security management.
- Develop security strategies aligned with organisational objectives.
- Analyse the internal and external security environment.
- Identify emerging threats and strategic security challenges.
- Establish security goals, objectives, and performance indicators.
- Understand effective security leadership and governance.
- Optimise security resources, budgets, and operational capabilities.
- Evaluate security performance and organisational resilience.
- Improve coordination between security and other business functions.
- Support continuous improvement in strategic security planning.

Target Audience

This course is designed for:

- Security Managers and Directors.

- Heads of Security Departments.
- Security Supervisors and Team Leaders.
- Corporate Security Professionals.
- Risk Management and Business Continuity Managers.
- Facility and Asset Protection Managers.
- HSE, Compliance, and Operations Managers.
- Professionals responsible for security planning and organisational resilience.

Recommended level: Intermediate.

Basic knowledge of security operations is beneficial but not mandatory.

Course Outline
