Investment Analysis & Portfolio Management

Duration **1 Week**	Fee **from £3,650**	Category **Finance & Business Acumen**
Ref **FB410**	Language **English**	Certificate **Certificate of attendance**

Introduction

This comprehensive 5-day Knowledge-Sharing and Professional Learning Visit Program provides participants with the opportunity to explore best practices, exchange experiences, and gain insights into investment analysis and portfolio management approaches used across financial institutions and corporate environments. The program focuses on financial markets, asset classes, investment evaluation methodologies, portfolio construction, risk management, and performance assessment. Through expert-led discussions, case reviews, and experience-sharing sessions, participants will develop a broader understanding of investment decision-making processes and contemporary investment strategies.

Program Objectives

By the end of this program, participants will be able to:

- Explore key principles and practices of investment management.
- Exchange knowledge on various financial instruments and asset classes.
- Review commonly applied approaches for evaluating investment opportunities.
- Examine portfolio construction and diversification practices.
- Gain insights into modern portfolio management concepts and strategies.
- Discuss risk assessment and mitigation approaches used in investment environments.
- Understand methods for evaluating portfolio performance.
- Explore current trends and developments in global financial markets and investment strategies.
