Occupational Health, Safety & Risk Control Management

Building a Safer Workplace through Awareness, Prevention, and Effective Risk Control Measures

Duration	Category	Ref
1 Week	**Health Care Management**	**HM392**
Language	Certificate	
English	**Certificate of attendance**	

Introduction

Ensuring a safe and healthy work environment is essential for organizational success and employee well-being. This course provides participants with the knowledge and practical skills needed to enhance occupational health and safety awareness, understand risk control measures, and effectively implement safety procedures.

Participants will learn how to identify workplace hazards, assess risks, and apply preventive measures to reduce incidents and improve overall safety performance.

Course Objectives of Occupational Health, Safety & Risk Control Management

At the end of this program, participants will be qualified to:

- Understand key concepts of occupational health and safety (OHS)
- Identify workplace hazards and assess associated risks
- Apply appropriate risk control measures using best practices
- Implement health and safety procedures effectively
- Promote a safety culture within the organization
- Ensure compliance with safety regulations and standards

Course Methodology of Occupational Health, Safety & Risk Control Management

- Lectures and Expert Insights: Leading industry experts will share their insights and best practices.
- Case Studies: Analyze real-world talent acquisition challenges and solutions.
- Group Discussions: Engage in meaningful discussions and share experiences with peers.
- Role-Playing and Simulations: Practice recruitment scenarios to enhance skills.

- Hands-on Workshops: Gain practical experience in using recruitment tools and techniques.

Organizational Impact of Occupational Health, Safety & Risk Control Management

- Reduced workplace accidents and incidents
- Improved compliance with health and safety regulations
- Enhanced safety culture across the organization
- Lower operational disruptions and associated costs
- Increased employee productivity and morale
- Strengthened organizational reputation and reliability

Personal Impact of Occupational Health, Safety & Risk Control Management

- Increased awareness of workplace hazards and safety practices
- Improved ability to identify and control risks
- Greater confidence in applying safety procedures
- Enhanced responsibility toward personal and team safety
- Better understanding of emergency response actions

Target Audience of Occupational Health, Safety & Risk Control Management

This course is suitable for:

- Supervisors and team leaders
- Health and safety officers
- Operations and maintenance staff
- HR and administrative personnel
- Project managers and site coordinators
- Employees working in environments with potential safety risks

Course Outlines

DAY 1

Introduction to Occupational Health & Safety

- Fundamentals of occupational health and safety
- Importance of workplace safety culture
- Roles and responsibilities in OHS
- Common workplace hazards (physical, chemical, biological, ergonomic)
- Legal and regulatory overview

Day 2

Hazard Identification & Risk Assessment

- Hazard identification techniques
- Risk assessment process (likelihood vs. impact)
- Risk evaluation and prioritization

- Introduction to risk assessment tools (risk matrix)

Day 3

Risk Control Measures

- Hierarchy of controls (elimination, substitution, engineering, administrative, PPE)
- Selecting appropriate control measures
- Implementing and monitoring controls
- Safe systems of work
- Personal Protective Equipment (PPE): selection and usage
- Practical examples and exercises

Day 4

Health & Safety Procedures

- Developing and implementing safety procedures
- Permit to work systems
- Emergency preparedness and response planning
- Incident reporting and investigation
- Safety inspections and audits
- Communication and safety training techniques

Day 5

Safety Culture & Continuous Improvement

- Building and sustaining a safety culture
- Behavior-based safety concepts
- Monitoring and measuring safety performance (KPIs)
- Continuous improvement in safety management
- Leadership role in safety
- Action planning for workplace implementation
