Oracle Cloud Applications Functional Overview

Duration	Category	Ref
1 Week	**Health Care Management**	**HM445**
Language	Certificate	
English	**Certificate of attendance**	

Introduction:

Oracle Cloud Applications Functional Overview is a foundation-level course designed to provide participants with a comprehensive understanding of Oracle Cloud business applications and their role in supporting modern organisational processes. The course focuses on the functional concepts, business processes, and capabilities of Oracle Cloud solutions without practical system configuration or technical implementation.

Participants will gain an overview of Oracle Cloud application modules, including Human Capital Management (HCM), Finance, Procurement, and Supply Chain, while understanding how these solutions support business operations, data management, reporting, and decision-making. The course is ideal for professionals who interact with Oracle systems or need to understand Oracle Cloud functionality from a business perspective.

Course Objectives:

By the end of this course, participants will be able to:

- Understand the fundamentals and structure of Oracle Cloud Applications.
- Gain knowledge of Oracle Cloud modules and their business functions.
- Understand how Oracle solutions support enterprise operations and processes.
- Identify key concepts related to Oracle HCM, Finance, Procurement, and Supply Chain applications.
- Understand user roles, responsibilities, and access concepts within Oracle Cloud environments.
- Learn how business processes are managed through Oracle Cloud applications.
- Understand reporting, analytics, and data management concepts.
- Recognise the benefits of cloud-based enterprise applications and digital transformation.
- Improve communication between business users and Oracle functional teams.

Target Audience:

This course is designed for:

- HR Coordinators and HC Operations professionals

- Business Coordinators and Administrative Officers
- Oracle end users and business stakeholders
- Project coordinators involved in Oracle implementations
- Functional support teams
- Managers and supervisors who need an understanding of Oracle Cloud capabilities
- Professionals seeking foundational knowledge of Oracle Cloud Applications
