Procurement & Supply Chain Management · PS287

Logistics and Supply Chain Optimisation in Port Environments

Enhancing Efficiency and Competitiveness in Modern Port Operations

Duration **1 Week**	Fee **from £1,400**	Category **Procurement & Supply Chain Management**
Ref **PS287**	Language **English**	Certificate **Certificate of attendance**

Introduction

In an increasingly interconnected world, ports serve as critical nodes in global supply chains, handling vast volumes of goods and materials. However, optimising these operations is a complex challenge that requires a strategic approach. This programme explores advanced techniques and tools to improve logistics and supply chain efficiency within port environments. Participants will gain insights into managing port operations, leveraging technology for optimisation, and applying sustainable practices to enhance overall performance.

The course is designed to provide both theoretical frameworks and practical applications, helping participants address real-world challenges in port logistics.

Course Objectives of Logistics and Supply Chain Optimisation in Port Environments

Upon completing this programme, participants will be able to:

- Understand the fundamentals of logistics and supply chain management in ports.
- Identify and implement strategies to optimise port operations.
- Utilise advanced technologies to enhance supply chain visibility and efficiency.
- Develop risk mitigation plans to address disruptions in port operations.
- Apply sustainability practices to minimise environmental impact.

Course Methodology of Logistics and Supply Chain Optimisation in Port Environments

- Lectures and Expert Insights: Leading industry experts will share their insights and best practices.
- Case Studies: Analyse real-world talent acquisition challenges and solutions.
- Group Discussions: Engage in meaningful discussions and share experiences with peers.

- Role-Playing and Simulations: Practice recruitment scenarios to enhance skills.
- Hands-on Workshops: Gain practical experience in using recruitment tools and techniques.

Organisational Impact of Logistics and Supply Chain Optimisation in Port Environments

This training programme will have a positive impact on organisations by:

- Enhanced efficiency in port logistics and supply chain operations.
- Reduced operational costs and improved resource allocation.
- Strengthened compliance with global trade regulations.
- Better stakeholder collaboration across the supply chain.
- Increased adaptability to evolving market demands and challenges.

Personal Impact of Logistics and Supply Chain Optimisation in Port Environments

Participants will experience personal growth and development, including:

- Advanced knowledge of logistics and supply chain optimisation.
- Improved analytical and problem-solving skills.
- Ability to manage complex port operations effectively.
- Enhanced leadership and decision-making capabilities.
- Broader career opportunities in the logistics and maritime industries.

Who Should Attend

This training programme is ideal for:

- Port and terminal managers
- Logistics and supply chain professionals
- Operations and process improvement managers
- Shipping and freight forwarding professionals
- IT and technology specialists in logistics
- Risk management and sustainability officers

Course Outlines

Day 1

Fundamentals of Port Logistics and Supply Chain Management

- Overview of port operations in global trade
- Key logistics and supply chain principles
- Challenges and opportunities in port-centric logistics
- Successful port logistics frameworks

Day 2

Optimising Port Operations and Supply Chain Flow

- Port layout and infrastructure optimisation
- Techniques for improving cargo handling and storage
- Strategies for reducing bottlenecks and lead times

- Identifying optimisation opportunities in a port system

Day 3

Technology Integration in Port Logistics

- Role of digital tools: IoT, AI, and blockchain
- Enhancing supply chain visibility through data analytics
- Implementing a smart port solution
- Digital transformation in port operations

Day 4

Risk and Sustainability Management in Port Environments

- Identifying risks and building resilience
- Sustainable practices for reducing environmental impact
- Regulatory compliance and risk mitigation strategies
- Managing a crisis in port operations

Day 5

Performance Metrics and Future Trends

- Key performance indicators (KPIs) for port logistics
- Tools for monitoring and improving operational efficiency
- Emerging trends: Green ports and automation
- Designing a logistics optimisation plan for a port

Dates & Venues

Date	Venue	Duration	Fee
30 Nov 2026 - 4 Dec 2026	Barcelona (Spain)	1 Week	£5,000
30 Nov 2026 - 4 Dec 2026	Paris	1 Week	£5,150
30 Nov 2026 - 4 Dec 2026	London	1 Week	£5,000
6 - 10 Dec 2026	Cairo	1 Week	£3,100
7 - 11 Dec 2026	Singapore	1 Week	£5,250
7 - 11 Dec 2026	Madrid	1 Week	£5,000
13 - 17 Dec 2026	Manama (Bahrain)	1 Week	£3,650
20 - 24 Dec 2026	Istanbul	1 Week	£5,000
20 - 24 Dec 2026	Dubai	1 Week	£3,650
21 - 25 Dec 2026	Amsterdam	1 Week	£5,150
27 - 31 Dec 2026	Online	1 Week	£1,400
28 Dec 2026 - 1 Jan 2027	Kuala Lumpur	1 Week	£5,000
