Introduction

Procurement has evolved from a simple administrative procedure to a full-fledged strategic business unit. It is no longer sufficient to simply convert requisitions into orders and then wait for the goods or services to be delivered. As a result, it is critical for Procurement to consistently deliver value to the organisation by delivering products and services that contribute to the organisation's well-being.

In order to do this, Best Practices have to be implemented on four levels:

- Strategic
- Tactical
- Operational
- Contingency

This Procurement Best Practices training course will address the necessary conditions at all four levels for those delegates who want to implement high-performing Procurement functions.

Course Objectives of Procurement Best Practices

Participants attending this training course will:

- Comprehend the evolution of Procurement
- Examine the inputs, outputs, and processes of the system
- Design meaningful performance measurements
- Learn the necessary conditions to be taken on all four levels

Course Methodology of Procurement Best Practices

Participants will expand competencies via various instructional techniques including a lecture by an experienced practitioner and consultant, exercises, review published articles, and group discussions covering current practices and their relationship to the implementation of new concepts.

Organisational Impact of Procurement Best Practices
