Duration	Fee	Category
1 Week	**from £5,000**	**Procurement & Supply Chain Management**
Ref	**Language**	**Certificate**
PS417	**English**	**Certificate of attendance**

Introduction

Effective logistics and distribution management are critical for ensuring the smooth flow of goods, reducing operational costs, and enhancing customer satisfaction. This course provides participants with practical knowledge and strategies to optimise logistics operations, improve distribution efficiency, and support organisational performance in today's competitive business environment.

Course Objectives

By the end of this course, participants will be able to:

- Understand the key principles of logistics and distribution management.
- Improve transportation, warehousing, and distribution operations.
- Apply effective inventory and supply chain management practices.
- Identify opportunities for cost reduction and operational efficiency.
- Enhance customer service through optimised logistics processes.
- Measure and improve logistics performance using key performance indicators (KPIs).
