Fee	Ref	Language
£5,000 GBP	**HM332**	**English**

Introduction

Creating a culture of health and safety is more than just complying with laws and regulations — it's about embedding values, behaviours, and systems that prioritise the wellbeing and protection of everyone in the workplace. This course equips participants with the knowledge, tools, and leadership approaches to foster a proactive and sustainable safety culture that positively impacts morale, productivity, and business continuity.

Course Objectives of Creating a Culture of Health and Safety

Upon completing this programme, participants will be able to:

- Understand the key components of a positive health and safety culture.
- Identify gaps and challenges in current workplace safety practices.
- Develop strategies to engage leadership and employees in safety initiatives.
- Promote psychological and physical health as part of workplace safety.
- Design and implement practical programmes to sustain safety awareness.

Course Methodology of Creating a Culture of Health and Safety

- Lectures and Expert Insights: Leading industry experts will share their insights and best practices.
- Case Studies: Analyse real-world talent acquisition challenges and solutions.
- Group Discussions: Engage in meaningful discussions and share experiences with peers.
- Role-Playing and Simulations: Practice recruitment scenarios to enhance skills.
- Hands-on Workshops: Gain practical experience in using recruitment tools and techniques.

Organisational Impact of Creating a Culture of Health and Safety

This training programme will have a positive impact on organisations by:

- Reduced accidents, absenteeism, and legal liabilities.
- Stronger compliance with HSE and labour regulations.

- Enhanced employee engagement and retention.
- Improved reputation and stakeholder trust.
- A resilient and safety-conscious workforce.

Personal Impact of Creating a Culture of Health and Safety

Participants will experience personal growth and development, including:

- Enhanced skills in leadership and risk communication.
- Better understanding of behavioural safety principles.
- Practical tools for leading change and improving team safety.
- Increased confidence in identifying and addressing safety concerns.

Who Should Attend

This training programme is ideal for:

- HSE Officers and Managers
- HR and Occupational Health Professionals
- Team Leaders and Supervisors
- Facilities and Operations Managers
- Senior Executives responsible for workplace wellbeing

Course Outlines

Day 1

Foundations of a Safety Culture

- Defining health and safety culture
- Legal vs. cultural compliance
- Organisational behaviours and safety outcomes
- Real-world case studies: culture-led safety success stories

Day 2
